Response to Amendment

The amendment filed on 9/23/05 has been entered. In view that the art used in the 35 USC 103(a) rejection does not qualify as a 102(a), the published paper is not "by other", the rejection of the claims is withdrawn.

EXAMINER'S AMENDMENT

Authorization for this examiner's amendment was given in a telephone interview with Henry Heines on 11/21/05.

The application has been amended as follows:

Claims 19-36 have been cancelled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The cited prior art fails to disclose or reasonably suggest mechanically activating a powder mixture of silicon carbide, silicone nitride, boron nitride, consolidation of the powder mixture by compressing and passing an electric current through the powder mixture in the presence of 0 to 1% by weight of a metal oxide densification aid to achieve a fused Si-C-B-N mass comprised of crystals less than 100 nanometers in diameter.

The cited prior art, such as US 6,133,180 discloses a mixture of silicon carbide and silicon nitride having the claimed particle size. However, US 6,133,180, specifically teaches away from using a sintering aid/densification aid below 5% in col. 6, lines 20ff.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1731

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
